This is a bunch of "bull"! I am a truck driver and this information is very useful to us drivers. We can know well in advance what problems we may have with weather or know in advance to take an alternative route. It's too late if we had to depend on local stations since we can't pick them up until we are already in the area. Plus, I don't know what the local stations are so it takes forever to find one. I pay for my xm radio subscription and feel I am entitled to have the information! NAB needs to upgrade their services if they want to fight the competition instead of trying to shut them down!! What a "cheap" shot! The truck drivers love their xm radios, it's so nice to be able to listen to a station without having to change stations every few minutes! The traffic and weather stations help us do our job more efficiently! Please reject NAB's petition 04-160!!
